

Take maintenance to the endpoint.

Run agentless patch management on a maintenance laptop. Maintain standalone systems when connected and correlate inventory into central IPM.

Illustrative workflow. Connections and permissions follow the approved deployment.

PRODUCT WORKFLOWS / KEY CAPABILITIES

- 01

Laptop-based tool

Bring the maintenance application to the standalone endpoint.
- 02

Agentless operations

Manage supported systems without an installed management agent.
- 03

Inventory and patch evidence

Collect asset inventory and available maintenance activity.
- 04

Central correlation

Bring collected inventory into IPM dashboards and reports.

The capabilities behind the workflow.

REPLIL CONTROL EDGE - detailed product features

Maintenance-laptop deployment

Run the standalone patch tool on a maintenance laptop. Bring the tool to systems that cannot participate in the normal centrally connected maintenance workflow.

Agentless management

Carry out supported patch-management operations without an installed agent on each managed system.

Standalone isolated systems

Manage systems that sit outside the normal connected patch-management workflow.

Update on connection

Update standalone systems as they are connected to the tool.

Central IPM inventory correlation

Correlate collected inventory centrally into REPLIL IPM for a wider view of the environment.

Dashboards and reports

Review activity and inventory through custom dashboards and reporting.

Make the workflow fit the facility.

- Standalone system maintenance**
 Run CONTROL EDGE on a laptop and connect the standalone endpoint for supported maintenance.
- Inventory collection**
 Collect available asset inventory and patch activity without a permanent central connection.
- Central correlation**
 Bring collected inventory into IPM with custom dashboards and reporting.

MINIMUM DEPLOYMENT RESOURCES

CPU	RAM	STORAGE
4 CPU cores	16 GB minimum	500 GB SSD minimum

Run CONTROL EDGE on a maintenance laptop with at least 16 GB RAM and 500 GB storage. Reserve additional capacity for selected patch content and collected inventory.

Maintenance laptop / release-specific supported OS

BUILT FOR CRITICAL INFRASTRUCTURE

Oil & gas

Energy & utilities

Manufacturing

Water

Smart cities

Transport
